

Corporate Advisory and Property Search – your Swiss office made to measure

Auris captures your corporate needs and identifies your Swiss options.

Auris Relocation is recognized internationally for its professional advisory and expert project management for companies aiming to relocate to Switzerland. The focus of our work is guidance towards identifying suitable locations and the search for business premises, as well as setting up and optimizing corporate infrastructure.

Upstream advisory services

Switzerland is unique, a model for many, a puzzle for some. Auris Relocation has first-hand knowledge, but maintains an objective vision of processes inherent to Switzerland. We explain and then manage these subtleties to the benefit of our corporate clients.

Top management of companies intending to move to Switzerland appreciate working with Auris Relocation as their projects unfold. Good decisions can be made with confidence when all the elements are in hand. Auris not only answers questions, we prompt the questions not asked.

Location advisory

With this program Auris Relocation defines and analyses the basic criteria important for the choice of a location. Fundamental elements include: basic feasibility, taxation aspects, human resources, property market, and general differences between the individual Swiss cantons and municipalities. We work with qualified specialists in matters relating to tax consultancy.

Auris Relocation has the added value of being present throughout Switzerland, not linked to or biased towards one specific region, thus being truly neutral in recommending any future location.

Property search

Auris Relocation's experience and access to key players of the local corporate real estate markets greatly facilitate success in identifying the property best suited to the needs of each corporation.

On the basis of a personalized catalogue of requirements, we provide companies with practical help in their search for suitable properties to rent or buy. Auris Relocation accompanies customers viewing possible premises, gives advice on pricing and conducts contract negotiations.

Infrastructure set-up

The Auris Relocation team takes charge of detailed planning and comprehensive project management for construction, conversion or extension of a chosen property.

We cover these points and more:

- Definition of goals and measures
- Negotiations and conclusion of contracts with specialist suppliers
- Coordination and overseeing of new building projects or renovations
- Advice on infrastructure and facilities
- Coordination of information technology and telecom installations
- Preparations for moving in and start-up

Move management

Auris Relocation works with renowned local and international removal companies as needed to get the most competitive prices. We assist in the selection of the provider, then prepare and coordinate the entire corporate move.
